

# Sanghee Yang, Ph.D.

Assistant Professor, Department of Chemistry, Inha University  
100 Inha-ro, Michuhol-gu, Incheon 22212, Republic of Korea  
shyang@inha.ac.kr | +82-32-860-7682

## Professional Career

|                                                                                                                             |                   |
|-----------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>Assistant Professor</b><br>Department of Chemistry, Inha University, South Korea                                         | 2023.03 – Present |
| <b>Postdoctoral Researcher</b><br>Department of Chemistry, University of Minnesota, USA (Advisor: Prof. Timothy P. Lodge)   | 2021.03 – 2023.02 |
| <b>Postdoctoral Fellow</b><br>Department of Chemistry, Seoul National University, South Korea (Advisor: Prof. Tae-Lim Choi) | 2020.09 – 2021.03 |

## Education

|                                                                                                                                                                                                                                                                      |                   |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>Ph.D. in Chemistry</b><br>Seoul National University, South Korea (Advisor: Prof. Tae-Lim Choi)<br>Dissertation: <i>Formation of Morphologically Tunable 1D and 2D Nanostructures from Fluorescent Conjugated Polymers by Crystallization-Driven Self-Assembly</i> | 2014.03 – 2020.08 |
| <b>B.S. in Chemistry</b><br>Seoul National University, South Korea                                                                                                                                                                                                   | 2010.03 – 2014.02 |

## Awards and Honors

|                                                                                                                            |      |
|----------------------------------------------------------------------------------------------------------------------------|------|
| <b>11th S-OIL Dissertation of the Year Award, Grand Prize in Chemistry</b><br>S-OIL Science Prodigy and Culture Foundation | 2021 |
|----------------------------------------------------------------------------------------------------------------------------|------|
